

QA4 / QA6 / QA8 Series

Precision Air Nutrunners

Because every assembly is critical

There's much more to an assembly application than merely putting wrench to bolt. It's an intricate matter of linking tool users and fasteners to deliver an uncompromised combination of accuracy, durability, speed, and ergonomics.

The solution: Ingersoll Rand precision air nutrunners.

Our newly designed precision air nutrunners are compact, lightweight, quiet, and durable enough for the toughest high-volume applications, yet still deliver the speed and accuracy you need. The QA4, QA6, and QA8 Series tools are easy to maintain — which means less downtime — and are fully configurable in straight or angle configurations, shut-off or stall, with fixed or floating spindles, and in a variety of drive sizes up to 225 Nm.

Trusted tools, proven experience

At Ingersoll Rand, we have extensive experience with threaded fastening processes. For more than 100 years, we've worked with many of the world's leading manufacturers in various industries, and we understand the interface of the tool and operator. We know how to leverage the power of ergonomically designed equipment to maximize productivity and inspire progress.

Ingersoll Rand Fastening Portfolio

Ingersoll Rand offers a full line of production fastening equipment, including air and electric screwdrivers, nutrunners, drills, riveters, and pulse tools, as well as hand-held and multi-spindle fixtured DC nutrunners. Whether you need a solution for a single, specific application or an entire assembly line, you can trust our century of tool design experience to meet your needs.

AIR NUTRUNNERS

 <p>Stall</p> <ul style="list-style-type: none">• Excellent durability• Economical alternative to shutoff tools• Pressure-regulated max torque• Angle and inline configurations• Torque Range: 6 to 225 Nm• Free speed: 90 to 1025 rpm <p><i>Recommended for non-critical applications or pressure controlled fixtured applications. Motor runs to stall providing consistent torque repeatability. Applied torque can be adjusted by regulating air pressure, but must be absorbed by the operator or reaction device.</i></p>	 <p>Shutoff</p> <ul style="list-style-type: none">• Excellent accuracy• Excellent durability• Excellent ergonomics for operator comfort• Quick shutoff limits torque reaction• Angle and inline configurations• Torque range: 6 to 225 Nm• Free speed: 90 to 1050 rpm <p><i>Recommended for applications where more precise torque control is required. Tool shuts off when preset torque is achieved, providing excellent repeatability with minimal torque reaction and reduced air consumption. The most accurate clutch available.</i></p>	  <p>Remote</p> <ul style="list-style-type: none">• Slim line for easy fixturing• Excellent accuracy• Excellent durability• Shutoff or stall configurations• Shutoff indicator port• Torque range: 6 to 180 Nm• Free speed: 125 to 1050 rpm• Compatible with fixtured systems <p><i>For fixtured applications requiring air tools, Ingersoll Rand provides an entire line of remote start air tools. These reversible tools run without a lever on fixtured multiples or in a single workstation application.</i></p>	 <p>Accessories</p> <ul style="list-style-type: none">• Torque arms• FRLs• Hoses and fittings• Sockets• Balancers• Gloves• Calibration Equipment• Service and more <p><i>Take advantage of our extensive line of accessories to optimize your assembly operations and maximize productivity.</i></p>

Angle Nutrunners

Configurable to your application — don't see your configuration? Contact your Ingersoll Rand representative for custom options

Externally adjustable precision shutoff clutch for consistent joints; ISO 5393 tested

Ergonomic grip for operator comfort

Ideally positioned reverse ring for ease of use

Quiet operation

360 degree indexing of anglehead provides maximum flexibility

Easy servicing with spanner wrench

Longer service life through precision machining and heat treatment

Non-lube motor

As with any Ingersoll Rand tool, count on QA4, QA6, and QA8 Series angle nutrunners to deliver what you need to get the job done reliably and with less effort.

Inline Nutrunners

Configurable to your application — don't see your configuration? Contact your Ingersoll Rand representative for custom options

Longer service life through precision machining and heat treatment

Precision shutoff clutch tested to 1 million cycles without failure

Ergonomic grip for operator comfort

Ideally positioned reverse ring for ease of use

Standard 4" inline spindle provides 19 mm of float to accomodate faster rundown in fixtured applications

Multiple mounting flange options provide flexibility to customize the application (see below)

Easy servicing with spanner wrench

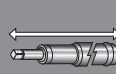

Externally adjustable precision shutoff clutch for consistent joints; ISO 5393 tested

Powerful non-lube motor

Quiet operation

Mounting flange options

Putting it all together

Ingersoll Rand precision air nutrunners, fastening accessories, and services set the standard for excellence — assuring you the accuracy, flexibility, and durability you need to maximize your productivity.

Productivity

Ingersoll Rand delivers a complete solution to get the job done right.

- ▶ **Assembly line audits** — to optimize your fastening processes
- ▶ **Highest-quality tools and accessories** — to improve your product quality, line ergonomics and process flow
- ▶ **Torque arms and tubes, overhead rail, and hangers** — to enhance the layout, ergonomics, and ultimately the speed of your line
- ▶ **Calibration and service contracts** — to ensure your line is running to its full potential day in and day out

Accuracy

Ingersoll Rand delivers the accuracy you need to ensure the quality of your product.

- ▶ **Quick, precise clutch shutoff** limits scatter and torque reaction to the operator
- ▶ **Adjustable shutoff clutch** provides repeatability that improves joint quality
- ▶ **ISO 5393 tested**
- ▶ **Cycle counting capability** enables integration into process flow systems

Flexibility

With Ingersoll Rand you get the flexibility to choose the system that fits your application.

- ▶ **Three powerful motor options** to match the speed to need
- ▶ **Choice of inline or angle configurations**
- ▶ **Adjustable shutoff clutch or stall**
- ▶ **Multiple spindle lengths, floats, and drive sizes**
- ▶ **360-degree anglehead indexing**
- ▶ **Single or multi-spindle fixtured systems** to increase productivity and improve joint quality

Durability

Ingersoll Rand stands behind every tool and accessory, and offers the service levels you should expect from a leader in the industry.

- ▶ **2-year warranty** on anglehead and clutch
- ▶ **Clutch tested to over 1 million cycles** without failure
- ▶ **Proven components** from our world-class QE Series DC tools
- ▶ **Long life** reduces your life-cycle costs

Remote Start

Configurable to your application — don't see your configuration? Contact your Ingersoll Rand representative for custom options

Standard flange provides secure fixturing point

Longer service life through precision machining and heat treatment

Powerful non-lube motor

Compact, slim design provides easy fixturing

Externally adjustable precision shutoff clutch for consistent joints; ISO 5393 tested

Precision shutoff clutch tested to 1 million cycles without failure

Easy servicing with spanner wrench

Standard 4" inline spindle provides 19 mm of float to accommodate faster rundown in fixtured applications

Secondary exhaust (reverse)

Primary exhaust

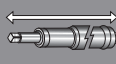

Inlet (forward)

Cycle count air port provides tool shutoff signal

Fixtured Systems

Ingersoll Rand offers a full line of solutions to maximize your productivity, including single and multi-spindle fixtured systems. Whether a simple, single spindle or a sophisticated set of custom engineered multi-spindle systems, our global network of Solutions Centers is capable of providing the services you need, including: application studies, line audits, design, project management, installation and service.

QTA Torque Arms

Ingersoll Rand offers an impressive line of ergonomic torque reaction arms that help operators work more safely and comfortably while maximizing efficiency, to ensure product quality and minimize downtime. See the full QTA Torque Arm brochure (IRPS-0907-044) for a complete listing of torque arm products and specifications.

The best equipment deserves the best service

At Ingersoll Rand, we know how important your equipment is to your livelihood. That's why for the past 100 years we've been setting the standard for not just powerful and durable products, but also for providing total solutions that help you get the job done right.

As tough as our equipment is, we also know that it needs to be maintained. When the time comes, let Ingersoll Rand meet your service and repair needs through our expansive Certified Service Network.

Each Certified Service provider has the specialized testing equipment, genuine parts, and skilled training to ensure you're back up and running at Original Equipment Manufacturer (OEM) specifications.

Global reach, local service

No matter where your facility is located, Ingersoll Rand is committed to serving you 24 hours a day, seven days a week. Our worldwide network of distributors, certified, factory-trained technicians, and engineers are a phone call away — ready to support you with innovative and cost-effective solutions that will keep you running at peak performance.

**Repairs done right.
Service made simple.**
